

EDUCATION

•Bachelor of Technology in Information Technology	2023–27
AISSMS Institute Of Information Technology, Pune, India	CGPA: 8.4

TECHNICAL SKILLS AND INTERESTS

Languages & Frameworks: C, C++, Python, JavaScript, TypeScript, HTML/CSS, React.js, React Native, Flutter, Next.js, Tailwind CSS.

Backend & DevOps: Node.js, REST APIs, GraphQL, Docker, AWS (EC2/S3), CI/CD, Firebase, Payment Integration (Razorpay/Stripe).

Databases & Security: MongoDB, PostgreSQL, Oracle SQL, Database Security, Authentication (JWT/OAuth2), RAG (Retrieval-Augmented Generation).

AI/ML & Specializations: Generative AI, LLM Integration, NLP, Prompt Engineering, Android/iOS Cross-Platform Development, Agile/Scrum.

Tools & Platforms: Git, GitHub, VS Code, Figma, Canva, SEO, Digital Marketing, Social Media Management, App Store Optimization.

Soft Skills: Problem Solving, Leadership, Adaptability, Stakeholder Communication, Presentation, Team Management.

EXPERIENCE

•Freelance Software Developer	2025 – Present
Independent Contractor — Full-Stack & Mobile Development	Remote
– Secured international client from Europe; managed end-to-end SDLC including requirements gathering, sprint planning, stakeholder communication, and cross-functional team coordination.	
– Established agile task allocation framework enabling efficient remote project delivery, on-time milestones, and iterative product improvement.	
•SaptaSwad Foods Private Limited	Feb – Apr 2025
Full-time Paid Internship — Growth & Tech	Offline
– Drove brand growth through digital content creation, social media advertising, and Canva-based product packaging design, boosting online reach and engagement metrics.	
– Architected and launched the company’s e-commerce website with product listings, improving digital presence, conversion funnel, and customer accessibility.	

PROJECTS

•Trackate – Expense Tracking App (Fintech)
Flutter, Firebase, Dart, Cross-Platform (Android/iOS), ASO, Digital Marketing
– Built and shipped a cross-platform fintech app using Flutter and Firebase with real-time expense tracking, user authentication, and cloud sync; achieved 1,000+ downloads in Month 1 via targeted growth marketing and ASO.
– Owned full product lifecycle: UI/UX design, backend integration, performance optimization, and data-driven user acquisition strategy.
•SpinMeal – Food Discovery Platform
React Native, Firebase, Cross-Platform (Android/iOS) + Web App, Payment Gateway, REST API
– Engineered a cross-platform food discovery, Firebase-secured user authentication, and integrated payment gateway .
– Delivered seamless Android/iOS UX with mobile-first responsive design and scalable Firebase backend for real-time data management.
•Eduate – EdTech Learning Platform
React, Next.js, Node.js, MongoDB, PostgreSQL, WebRTC, Payment Integration, Role-Based Access Control
– Developed a scalable full-stack EdTech platform featuring live streaming (WebRTC), real-time chat, notes upload, and multi-role dashboards (Student/Teacher/Admin) with RBAC .
– Integrated Razorpay payment gateway for course enrollment, enforced database security across PostgreSQL & MongoDB , ensuring data integrity and compliance.
•Rescale India Foundation – NGO Website
HTML, CSS, JavaScript, Responsive Design, Web Accessibility (WCAG), SEO
– Designed and deployed a fully responsive, WCAG-accessible NGO website with optimized content architecture, improving SEO visibility and cross-device user engagement.
•Sneaker Shop – E-commerce Website
HTML, CSS, Bootstrap, JavaScript, Responsive Design, DOM Manipulation
– Built a responsive e-commerce frontend with Bootstrap mobile-first layout, dynamic product filtering, and real-time cart updates via JavaScript DOM manipulation.
•Stationary Stories – AI-Powered Inventory Management System
React, Next.js, Node.js, Chart.js, MongoDB, Gemini API, Generative AI
– Built a full-stack inventory SaaS with Generative AI demand forecasting via Gemini API , real-time Chart.js dashboards, and scalable MongoDB data layer on Next.js .
•NLPreC – Intelligent Course Recommendation System
Python, NLP, TF-IDF, Cosine Similarity, RAG, Streamlit, Generative AI, Machine Learning
– Built an NLP-powered RAG -based course recommender with TF-IDF vectorization and cosine similarity; achieved F1@5 = 0.82, outperforming keyword-matching baselines by 71%+ .

POSITIONS OF RESPONSIBILITY

- Managing Team Lead, ‘Next Gen Expo 2024’**– Orchestrated 40–50 member event team across logistics, tech, and operations at AISSMS IOIT. *Apr 2024*
- Vice President, MLSA Club**– Led 2–3 large-scale technical & community events (100–150 participants); managed speakers, volunteers, and mentored junior members. *Aug 2024–2025*
- Vice President, ITSA (IT Student Association)**– Spearheading student community initiatives, technical workshops, and industry-academia collaboration programs. *Aug 2025–Present*

RESEARCH AND PUBLICATION

- Smart Inventory Solutions: Leveraging AI in Stationery Retail Management** *Apr 2025*
 - Proposed a **Gen AI**-powered inventory system with real-time dashboards for stock valuation, demand forecasting, and revenue analytics, enabling data-driven retail decision-making.
 - Demonstrated measurable gains in stock accuracy and replenishment efficiency over traditional rule-based inventory systems.
- Smart Automatic Battery Charging System Using ESP32 with Auto Cutoff** *Apr 2025*
 - Designed a low-cost **IoT** Li-ion charging system using **ESP32** with 95% SoC auto-cutoff, voltage/current sensing via relay control, and real-time **OLED** feedback.
 - Validated embedded hardware prototype for overcharge protection and energy efficiency in IoT and embedded systems contexts.
- AI-Powered Course Recommendation Using NLP: Architecture, Personalization & Evaluation** *2025*
 - Published research on **NLPRec**, an intelligent **RAG**-based MOOC recommender using a 7-stage NLP pipeline, TF-IDF, and cosine similarity; $F1@5 = 0.82$, with 71%+ improvement over keyword baselines across Coursera, edX, and Khan Academy datasets.
